PERSONAL PROJECTS

MoogleApi - www.moogleapi.com

- This is a web application with API controllers so that I can manage the database from an interface and serve the content to whomever would like to consume it
- The tech stack is .NET Core 2.2 hosted in Azure with an Azure SQL database. The landing page is wired up with Vue.js

mooglekt - <https://github.com/jackfperryjr/mooglekt>

- This is a dating/matching app I built for Android as a Code Louisville project
- It's all Kotlin and utilizes MoogleApi to return random characters
